Columbia Tech Tip # 121:

Finishers can work smarter and efficiency can improve by up to 15% because the system uses one single cup for measuring, mixing and spraying, which cuts down on materials, reduces product waste, and saves on labor time. You will also use up to 70% less in cleaning solvents, which means reduced costs in solvent disposal and operator exposure to solvents.

**“Outstanding
 Quality & Service.
 No Compromise.”**
